

PUBLIC NOTICE

DATA CLEANSING DOOR-TO-DOOR PHYSICAL VERIFICATION

The municipality would like to inform all residents and business owners that it will commence with a clean-up of its customer data and updating of its records of all the property information across the Municipal boundary.

The aim of the clean-up is to improve on the reliability of the revenue data, which will ultimately result in improved revenue billing and collection. A service provider by the name of **2 T Innovation**, has been appointed to conduct physical verification on each property.

The field workers will verify the property information such as Erf numbers, physical addresses, property usage, the owner or occupant's information, ID, contact details, electricity and water meter details, availability of refuse bins and access to the property.

Once the data clean-up is complete the new accurate data will assist the municipality with timely and accurate meter readings, correct billing and a reduction in billing errors.

We urge our communities to support this initiative and open doors to the data collection field workers who will be identified with branded identity cards which contains the name of the field worker as well as the logos of both the municipality and **2 T Innovation** and wearing bright green safety vests/bibs.

Residents who are available after office hours are requested to leave a note inside their premises indicating their availability or alternatively contact the municipality via e-mail at: kabelog@maquassihills.org or call on this number: 018 596 3025 during office hours to advise on the convenient time to visit.
